Tel: +91-7006961858

 ulislam.junaid25@gmail.com

Highly skilled and motivated senior software developer with around 7 years of experience working from front-end to back-end, and all the way to databases. Seeking to draw on proven software development and engineering skills to take on more challenging and exciting roles and responsibilities.

Experience

Yarikul infotech

Feb 2018 - Present

Senior Software Developer

Responsible for:

- Building the front-end, developing and maintaining the back end in a scalable and efficient manner.
- Internal API development and ensuring efficient web development.
- Expanding and unit testing the features, refining the code, improving overall process.
- Developed and enhanced various Excel based reports, that were critical to the businesses of our clients, using MS Excel, VBA, and SQL.
- Developed a web-based reporting module from scratch to take advantage of the web, and to overcome the issues with excel based reporting, thereby improving the overall developer productivity and enhancing the user experience to a great deal.
- Getting involved in DevOps and working with various AWS services to help provisioning the cloud infrastructure, and to maintain and troubleshoot it.
- Ensured tight cooperation with other developers, testers, and the management through active listening, systematic communication, and leadership skills.
- Fixed bugs and problems across the entire codebase in an efficient, timely manner.

Freelance Web Developer

April 2017 - Oct 2017

- Worked mostly as a freelance web developer during this period, and designed and developed various WordPress sites, custom websites, worked on developing an invoicing solution for a company with integration to a payment gateway, etc.

BQE Software
Database Developer

Aug 2015 – Mar 2017

This role primarily involved migrating databases to from any system to company's software using SQL Server.

- I was involved in writing SQL scripts, stored procedures, and functions to migrate and reconcile data.
- Performed database Analysis and issue Resolution.
- Enhanced various SQL scripts, and fixed various issues in a performant and efficient way.
- Working with non-SQL databases and extracting data using ODBC connection.
